

The Art of the Mirror Television

Elevate your television experience by introducing the **warmth** of human touch and removing the appearance of a **cold** black plastic screen.

When the TV is off it's a mirror! [above]

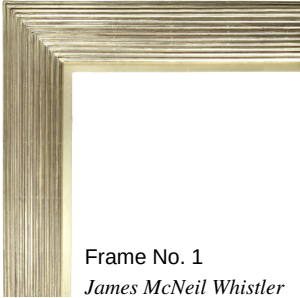

Fattori
FINE FRAMES

Est. 2014

FRAME: A bespoke hand-carved and gold gilded [12-22 kt] frame will lift your interior space and create a soft glow around your television.

MIRROR: Advanced coated glass with dual-functionality allows approximately 70% of light transmission when the television is on while providing a reflective mirror surface when off.

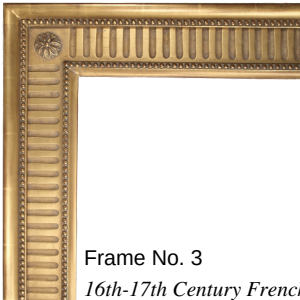

THE FRAMED MIRROR-TV is the perfect solution to the black plastic screen for your home, office, or yacht. Below are our most popular styles, or visit our website www.fattorifineframes.com for other modern or historically inspired frames.

Frame No. 1
James McNeil Whistler
